my understanding is that sanitation has given LAPD the resources for this? anyways, he's in an area that is dangerous construction zone with sidewalk and street use permits. please help us asap. plus, he's breeding pit bulls and has much more than 60 gallons, maybe 360 gallons and much of it is even stacked in the street in a commercial loading zone where we have our street use permit.

As you know, LA San will have to be the lead with this request. They may have to post as well.

hello sgt walker and bladimir. thank you for your cooperation this morning. we successfully cleaned our block with OHS and fenced the remaining portions of our sidewalks for ongoing building maintenance.

we still have two issues:

1. there is a homeless camp at the corner of our construction site beneath our scaffolding at 4th and towne. this is dangerous and in our way as we pour concrete, load and unload steel, etc. we have both a sidewalk permit and a street use permit. please do everything you can to move this camp off of this block.

2. we still need to fence the north section of 5th street east of towne avenue for approx 150 feet. OHS wasn't prepared to help us with this today. we have had our permit posted in that area since friday. could you please coordinate this sidewalk clearance with us tomorrow morning?

best,
